Programming · Game development · Art · Foreign languages

Nathaniël Jans

Technical Game Designer & Developer

PROFILE

4th-year Creative Media & Game Technologies student (Game Design & Development minor). I design gameplay systems and build playable prototypes myself to prove ideas in practice. With a background in full-stack web development I can take an idea from design document to working code. Looking for a gameplay / systems design internship in the first half of 2027.

WORK EXPERIENCE

2026
Skunx Studios
Game developer (freelance assignment)
Improved and expanded my escape room game JIM and adapted it to Skunx Studios' own IP. Details under NDA.

Sep 2025 – Feb 2026
WebinarGeek
Software development intern
Successfully delivered a complete new feature in the live product: the simulated viewer count.

Sep 2021 – Apr 2023
VR4Play
VR host
Guided customers renting VR headsets; repaired and maintained the headsets.

SELECTED PROJECTS

Fall 'n Fashion Unity · mobile · team of 6 · released
Gameplay programming, procedurally generated worlds with a logarithmic difficulty curve and seeded levels, globe level select and UI.

Conquest Rush Godot · Android · 2-person studio · beta
Lane strategy roguelite across five ages: counters, perk tree, bosses and meta-progression. No AI used.

JIM Unity · DreamOS · CMGT Showcase
Hybrid escape room: a simulated OS combined with printed evidence. Concept, puzzle design and development.

Project Implant (WIP) Unity · team of 15 · minor project
Horror-stealth game with invisible enemies. Concept pitch, GDD and stealth / detection design.
